Defines input namelists and global variables, details of input namelist can be viwed at initial.

[called by: focus.]   [calls: initial.]

0.1   Useful parameters

0.2   IO units

0.3   Input namelist: `focusin`

0.4   MPI stuffs

0.5   surface and coils data

0.6   Packing and unpacking

0.7   Optimization

0.8   Knotran parameters

0.9   Reading coils file

0.10   Time counting

0.11   Miscellaneous
